DETAILED ACTION

Claims 1-14 are currently pending in this application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to polynucleotide, vector and host cell, classified in class 435, subclass 252.3.
- II. Claims 11-12, drawn to a transgenic plant, classified in class 800, subclass 8.
- III. Claims 13-14, drawn to a polypeptide with an amino acid sequence SEQ ID NO:1, classified in class 435, subclass 200.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III are patentably distinct from each other. These are all different products. The polypeptide of group III, the polynucleotide of group I and the transgenic plant of group II, each comprise amino acid sequences and nucleotide sequences which are chemically unrelated, do not require each other for practice; have separate utilities, such as use of the group III polypeptide to catalyze a hydrolytic reaction versus the use of polynucleotide in a hybridization reaction and are subject to separate manufacture and sale. The groups have acquired separate status in the art and separate fields of search.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1652

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
